

High-level Summary

In case you prefer to include text with the 'Welcome to ReadCube Overview' or would like to promote the tool on an intranet page, company newsletter, etc. below is an excerpt you may use.

What is ReadCube? ReadCube is a comprehensive literature management solution we've invested in to simplify the way you discover, organize, read, share, and cite scholarly literature.

What can I do with ReadCube?

- Quickly create a robust literature library by transforming PDFs scattered on desktops, cloud storage, or other tools into a fully searchable library that is accessible across the web, desktop, and mobile apps.
- Easily see the full picture of an article upon import - articles are automatically matched to include full metadata, supplemental material, and impact metrics.
- Discover new content with ReadCube's built-in recommendation engine that includes full-text search of 120 million citations.
- Dive deeper into articles with the enhanced PDF reader which supports clickable inline citations, instant access to supplements, high-resolution figures, and powerful collaborative annotation tools.
- Organize content in your personal library and collaborate with colleagues using shared libraries where you can easily share references, PDFs, and annotations.
- Seamlessly add content to your library and access full-text anywhere on the web using one of the browser extensions.
- Create a bibliography with an easy-to-use citation writing tool, SmartCite. Offering over 9000 styles to choose from and is supported in both Word and Google Docs.
- Quickly obtain full-text access through document delivery instead of being stuck behind the dreaded paywall.
 - *(Note: this bullet should only be included if your organization elected to offer document delivery through ReadCube Papers.)*
