

Unlock the Power of ReadCube Pro

Discover how to work smarter, faster, and more efficiently with step-by-step guides to top features like AI-enhanced search, automatic email alerts, and chat with a PDF. Let's get started!

Supercharge Literature Discovery with AI

With ReadCube Pro, finding the most relevant research isn't just faster, it's smarter. Tap into 110M+ full-text articles, refine results using AI, and automate your discovery process with personalized alerts. Here's how to get started:

- ☐ **Generate a Smart Search Query**
 - Click on the Search icon (blue square with question mark) in the left menu of your ReadCube account.
 - Click 'Advanced' beneath the search bar.
 - Select the 'AI Assist' tab in the Advanced Search menu.
 - In the query builder bar, type your search in plain language—just like you'd ask a colleague.
 - Review the AI-generated query preview, then click 'Search' to run it.
- ☐ **Refine Search Results Using AI**
 - On the search results page, click the 'Filter' button (top right).
 - Choose a suggested filter prompt or type your own in natural language.
 - Click 'Ask', and the AI Assistant will apply filters based on your request, showing you the most relevant, high-impact results in seconds.
- ☐ **Save Your Search & Automate Discovery**
 - Click the star icon next to your search bar to save the query.
 - Choose 'Create a Library Feed' to automatically send new results to your Library.
 - Select an existing Library or create a new one for this particular search query.
 - Click 'Create' to activate automatic updates.
- ☐ **Automatic Email Notifications**
 - Click on the cog wheel next to the library name and select 'Settings' → 'AI Email Alerts'.
 - Determine the frequency of the alerts & select 'Attach AI Summaries to each reference in the alert'.
 - By default, the AI will provide a brief summary of each reference, however you also have the option of customizing the prompt.
 - Click on 'Save Changes' to finalize the set up.

Interact With Your Research Like Never Before

With ReadCube Pro's AI Assistant, you can interact directly with your PDFs, or even an entire set of articles in your library. From summarizing key findings to comparing study results, the Assistant helps you work faster and more confidently.

- ☐ **Chat with a PDF**
 - Open a PDF from your ReadCube library.
 - Click the AI Assistant icon (top-right corner of the PDF viewer).
 - Ask a question in natural language—no prompt engineering required.
- ☐ **Chat with your library**
 - Select up to 20 articles from your Library.
 - Right-click and choose 'Chat with AI Assistant'.
 - Ask questions like:
 - "Are the findings consistent across these studies?"
 - "What are the common methodologies used?"
 - The AI will scan all selected articles, synthesize an answer, and cite exactly where each insight comes from so you can easily validate.
